Nebraskan Reflections on "Grant Writing in the AI Era"

On the week of October 27, GPA Nebraska will be releasing a video reaction/response to the **"Grant Writing in the AI Era"** session.

Kevin Mahler and **Noelle Hoeft** will talk about the highlights of the event and invite viewers to comment and share their reflections.

A video of the conversation will be posted on gpanebraska.blog.

Grant Writing in the AI Era!

Before the conversation can happen, however, GPA Headquarters is hosting a webinar called "Grant Writing in the AI Era!" It will be taking place October 16, 2025 | Thu 11:00 AM CDT and it will be led by [Cyndi MacKenzie](#), GPC, GPA Approved Trainer. This event is FREE to members.

Event description: Artificial Intelligence continues to evolve and how a Grant Pro can utilize it has expanded, but does that mean if you choose not to use this tool that you will be behind the times, or will lose awards? Cyndi MacKenzie has surveyed national grant professionals in 2024 and 2025 on the use of, concerns for, and ethical considerations of the role of AI in the field. What has changed over these two years? In this session, we will review the findings of those surveys and discuss the ongoing benefits and challenges of using AI to secure resources.
